

SIRENA YACHTS

FORT LAUDERDALE / OCTOBER 2024 / FOR IMMEDIATE RELEASE

Sirena Yachts revealed more details about its new superyacht project Sirena 118 at FLIBS 2024

- *Decidedly contemporary 36m GRP superyacht*
- *Flexible tri-deck lay-out*
- *Six guest cabins with a two-deck (Loft) owner's suite option*
- *Exterior lines by Sirena's design team, interior by Cor D Rover and naval architecture by German Frers*

Sirena Yachts revealed more details about its new project, the **Sirena 118**, at the Fort Lauderdale International Boat Show 2024. This superyacht marks the birth of a new larger composite line with a waterline length over 24 meters and below 300GT.

Detailed design work for this decidedly contemporary 36m yacht is still under way. Three decks of accommodation are surmounted by a large sun deck, with an optional circular pool and lounging area at the bow and a vast beach club aft.

Sirena's trademark plumb bow makes a powerful statement and creates additional volume in an already generous hull. That makes space for a VIP and up to four guest cabins on the lower deck, with the owner's stateroom dominating the forward section of the main deck. Uniquely, the owner's suite can be spread across two decks, with a spiral staircase leading down to a huge relaxation area, complete with a fold-down swim platform close to the water.

Social areas are no less impressive. An informal dining and lounging area fill the main deck aft, with floor-to-ceiling windows and a seamless transition to the deck outside. There's more expansive dining and a wet bar on the upper deck, plus a more private exterior deck. The yacht is designed to operate with five crew and this number can be increased to seven thanks to the upper deck captain cabin.

The inimitable German Frers has once again developed the yacht's underwater profile, with lines and an exterior design drawn by Sirena's in-house designers to transmit the brand's true DNA. Cor D Rover is responsible for the timeless, relaxed feel to the interior of this first yacht, although owners can naturally customize the project as well.

SIRENA YACHTS

Built in GRP, the Sirena 118 is destined to be an efficient performer. Her fast displacement hull form is propelled as standard with two MAN V12 engines developing a total of 3,100hp. This gives the boat a top speed of 16 knots and an economical cruising speed of 11 knots. With the more powerful 3,800hp engine package, the boat delivers a top speed of 21 knots.

*“The 36-meter Sirena 118 will be the largest GRP yacht we have built to date,” said **Constantinos K. Constantinou, Head of Sirena Yachts USA.** “This superyacht is being meticulously crafted to embody the pinnacle of the values that have driven the global success of Sirena Yachts and Sirena Superyachts. Intelligent design, flawless engineering, and sleek, modern aesthetics are seamlessly integrated with our profound passion for the yachting lifestyle. We’re excited to keep yachting enthusiasts informed as this exceptional project progresses toward its 2026 completion.”*
